HOW WE HELP CLIENTS

Nex-Generation Battery Evaluations

Our battery evaluation services help you understand the performance, cost, and safety of your battery technology. We provide comprehensive testing and analysis to ensure your battery meets the demands of your application.

Electric Vehicles

Our battery evaluation services help you understand the performance, cost, and safety of your battery technology for electric vehicles.

Commercial Fleets

Our battery evaluation services help you understand the performance, cost, and safety of your battery technology for commercial fleets.

Emerging Transportation

Our battery evaluation services help you understand the performance, cost, and safety of your battery technology for emerging transportation applications.

UNPARALLELED CAPABILITIES

Cutting-edge Insights for Battery Technologies

At Exponent, we provide cutting-edge insights for battery technologies. Our experts analyze the latest trends and developments in the industry, providing valuable insights for our clients. We offer a range of services, including battery failure analysis, design review, and safety assessments. Our team of experts is highly skilled and experienced, ensuring that our clients receive the highest quality of service. We are committed to providing our clients with the most up-to-date and accurate information available, helping them to make informed decisions about their battery technologies.

Battery Failure Analysis & Investigation

Exponent provides battery failure analysis and investigation services. Our experts use advanced techniques to identify the root cause of battery failures, helping our clients to improve their battery designs and prevent future failures. We offer a range of services, including failure analysis, investigation, and testing. Our team of experts is highly skilled and experienced, ensuring that our clients receive the highest quality of service. We are committed to providing our clients with the most up-to-date and accurate information available, helping them to make informed decisions about their battery technologies.

Exponent provides battery design review, quality, and safety assessments. Our experts use advanced techniques to identify potential design flaws and safety issues, helping our clients to improve their battery designs and prevent future failures. We offer a range of services, including design review, quality assessment, and safety assessment. Our team of experts is highly skilled and experienced, ensuring that our clients receive the highest quality of service. We are committed to providing our clients with the most up-to-date and accurate information available, helping them to make informed decisions about their battery technologies.

Battery Design Review, Quality & Safety Assessments

Exponent provides battery design review, quality, and safety assessments. Our experts use advanced techniques to identify potential design flaws and safety issues, helping our clients to improve their battery designs and prevent future failures. We offer a range of services, including design review, quality assessment, and safety assessment. Our team of experts is highly skilled and experienced, ensuring that our clients receive the highest quality of service. We are committed to providing our clients with the most up-to-date and accurate information available, helping them to make informed decisions about their battery technologies.

SERVICES

Battery Risk Assessments & Corrective Action

Exponent provides comprehensive battery risk assessments and corrective action services. Our experts analyze battery systems to identify potential safety hazards and develop effective mitigation strategies. We work closely with clients to ensure compliance with industry standards and regulatory requirements.

Battery Vendor Evaluation Services

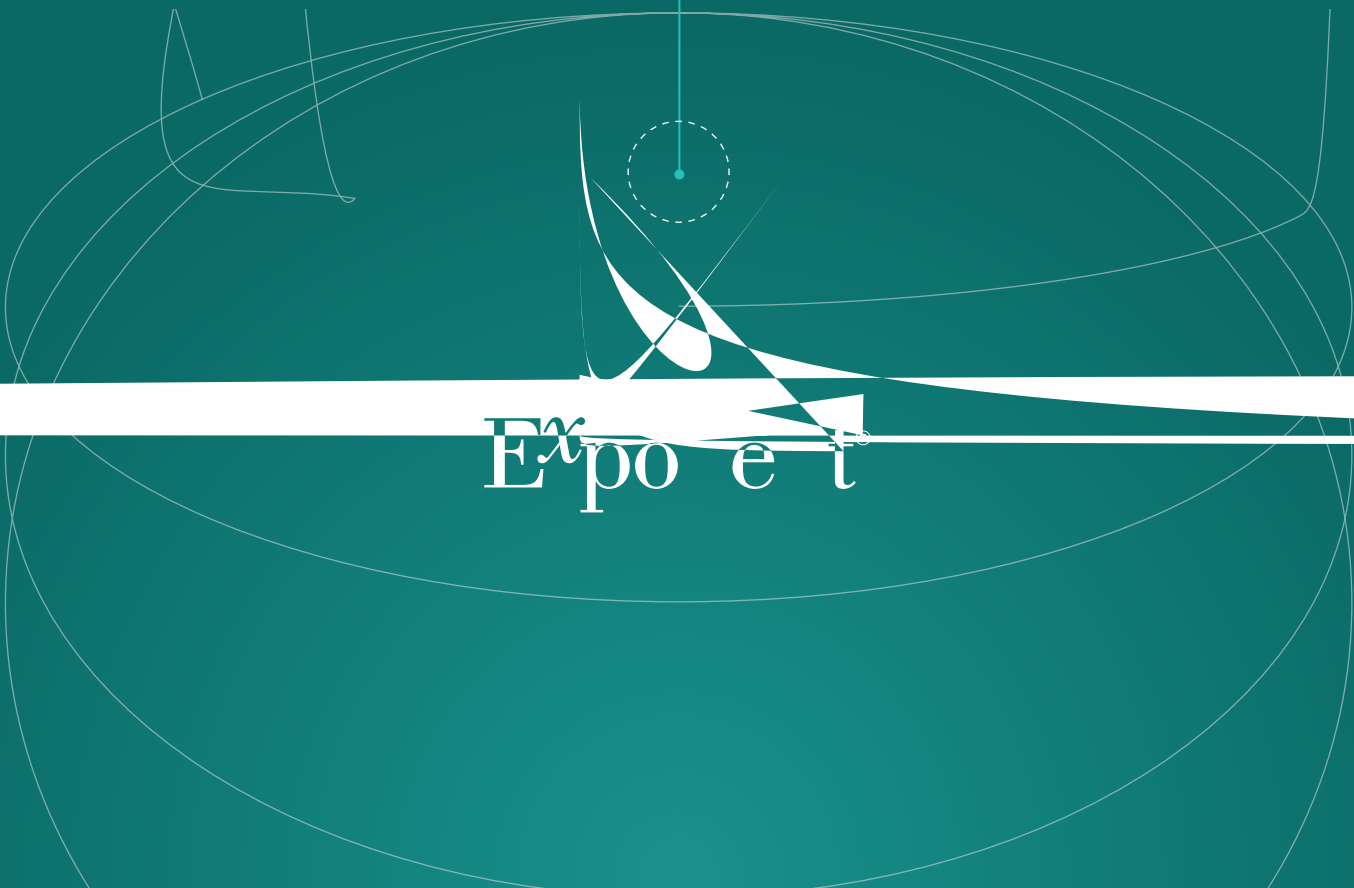

Exponent offers thorough battery vendor evaluation services to help clients select reliable and high-quality suppliers. Our team conducts detailed audits of manufacturing processes, quality control systems, and supplier capabilities. We provide clear reporting and recommendations to optimize the vendor selection process and reduce supply chain risks.

Custom Battery Testing

Exponent provides custom battery testing services tailored to specific client needs. Our advanced testing facilities simulate real-world operating conditions to evaluate battery performance, durability, and safety. We offer a wide range of testing protocols, including cycle life, temperature stress, and abuse testing, to ensure the reliability of your battery products.
